the important Customer Advisory below:***

MAR 2018

Please provide HS Code when booking with APL, effective 1 June 2018

Dear Valued Customer,

Customs authorities worldwide are increasingly demanding for Harmonized System code (HS code, also known as HTS code) in the cargo manifest. To ensure compliance, APL is enhancing our system to capture this detail when we confirm a shipment booking with you.

As such, effective **1 June 2018**, we seek your support to ensure that all booking instructions to APL include your cargo's HS code – applicable for all booking channels, cargo types and destinations. This will ensure you obtain the booking confirmation within the shortest time, and that your shipment arrives at its destination smoothly, ready for pick-up.

To obtain the HS Code for your cargo, you could [click here to visit the Harmonized Tariff Schedule site](#) set up by the U.S. International Trade Commission.

We thank you for your understanding and support. For enquiries, please contact your local APL representative.

Sincerely,

APL
