

## ***We are only getting better...CTPAT certified in 2019***

SEACORP has recently been approved by the US Customs and Border Protection (CBP) as a certified partner in the Customs-Trade Partnership Against Terrorism (C-TPAT) Program. C-TPAT is a voluntary supply-chain security program led by CBP focused on improving the security of private companies' supply chains with respect to terrorism. This certification enables SEACORP to participate and assist in helping secure our nation's borders and ensure the continued free flow of international trade and containerized cargo.

Several of the Benefits of Becoming C-TPAT Certified are:

- A dedicated supply chain security specialist
- Access to educational resources
- Faster transport of goods across the border
- Priority consideration following an emergency
- Eligibility to access the FAST lanes at the port
- Lower fines
- Site, personnel, and data security

To qualify for certification, SEACORP must comply with security and eligibility requirements to target and prescreen containers related to the terrorist threat to cargo destined to and from the United States. Through Container Security Initiative (CSI), CBP works to establish security criteria for identifying high-risk containers. When shipping internationally, safety is of the utmost importance. The C-TPAT certification provides an added feature to shipping internationally that gets your cargo to its destination more quickly and safely.
