

To our valued SEACORP customers and partners:

SEACORP is complying with all safety standards published by the CDC in regard to COVID-19. This week employees are working remotely and have been provided with all necessary equipment and resources to continue to provide our customers with exceptional service. SEACORP will maintain a reduced office staff to be sure that SEACORP has all options covered to maintain any additional service or availability needed to serve our customers and partners.

Due to the effects of COVID-19 SEACORP will experience changes that will most likely impact our normal course of business. SEACORP plans to work at full capacity to navigate through any disruptions to our customers. SEACORP is ready to keep customers informed and provide any alternative solutions that may be necessary. SEACORP will also communicate promptly about any actions that could impact your business that are not controlled by SEACORP.

Please see below contact information for all SEACORP contacts.
