

Dear Customers,

Please take note of the following information received from ACL and Grimaldi 3/26/2020 regarding Vehicle requirements.

"Please be advised, following our previous announcement for additional requirements to comply with IMDG Code Special provision 961 for the transport of vehicles in containers;

We would like to advise our customers that they can now upload the required pictures in GCG.

As a reminder, pictures need to be taken prior to the delivery of the container to the port and upload before deadline, after which system will be locked.

Failing to upload the pictures via GCG but sending it by email will attract \$ 25 per set of pictures sent , and no guarantee that the container will load on said vessel.

If no pictures, incomplete set of pictures, bad quality pictures, or not complying to our requirements, the container will not load.

The container will be rolled, and Roll fee will apply.

In addition , If any of the pictures shows non compliance to our requirements, the shipper will have to come and collect the container (at his costs) and to resubmit pictures once rectified, before returning the container to the port."
